

FloraCup was established in 1966 with the purpose of developing, manufacturing and selling flower packaging that uniquely protects and presents flowers and potted plants. This continues to be our approach and the aim is to manufacture the best quality flower packaging in the world.

Our flexible manufacturing plant, large warehouse capacity, and extensive distribution in Europe and the USA, enable us to fill orders with a very short notice. Apart from our large standard product program, we take pride in developing custom designed products for our customers. Our production facilities and many years of experience enable us to switch to new types of FloraCup quickly and without additional expense.

We look forward to developing a FloraCup product to your specifications.
